

Esfuerzo de compresión o tracción
Tensiones normales

Tensiones de corte

Esfuerzo de flexión

$\sum F = 0$
en todo diferencial
Balance de cont.
de Mov. lineal

$$\Rightarrow \frac{\partial \sigma_{ij}}{\partial x_j} + x_i = 0 \rightarrow \text{Ec. de equilibrio diferencial}$$

Balance de cont.
de Mov. angular

$$\Rightarrow \sigma_{ij} = \sigma_{ji}$$

$$\sum \underline{M} = 0$$

$$\left(\underline{\sigma} = \underline{\sigma}^T \right)$$

$$(\sigma_{ij}) = (\sigma_{ji})^T$$

$$T_i = \eta_j \sigma_{ji} = (\sigma_{ij})^T \eta_j$$

$$= \sigma_{ij} \eta_j$$

$$\left[\underline{\sigma} \right] \left[\underline{\eta} \right]$$
